

Impact Investing for Global Health: Cross Sectoral Learnings;

What does it take to be an 'impact investor' / 'impact investee' for global health?

"Impact Investment Initiative for Global Health (**Triple I for Global Health**)" is an initiative endorsed at G7 Hiroshima Summit in 2023, which aims to address global health issues through impact investment.

The event aims to bring together different sectoral stakeholders to share views and perspectives of what it takes to become a social impact investor for health or receive social impact investment through sharing good practices, in order to promote mutual understanding across the needs and drivers of stakeholders from across the health and financial sectors.
